SUMMARY

Responsible, motivated, and hardworking third-year engineering undergraduate looking forward to expanding knowledge in the field of Web Applications, AI, Mobile Development , improving technical and non-technical skills while making a significant contribution to the success of the organization.

PROJECTS

- **Plant Disease Prediction System (Individual)** — **Mar 2024 - Present**
  I have developed and deployed a predictive model for predicting plant diseases into a user-friendly website, ensuring accurate predictions . Currently, I am preparing to host the system and to develop a mobile application for expanding the system's reach. (CNN, Streamlit, TensorFlow)

- **Crop Marketplace and Delivery System (Group)** — **Aug 2023 - Present**
  The project focused on creating an user-friendly platform that enables seamless connectivity among farmers, sellers, and delivery personnel. In my role as a full-stack developer, I handled UI/UX designing, front-end and back-end development. Presently, I am actively involved in the development of a chatbot to enhance user experience.(MERN Stack, JavaScript, CSS, CNN)

- **Brain Tumor Prediction (Individual)** — **Jan 2024 - Mar 2023**
  I have spearheaded a deep learning project aimed at identifying brain tumors from MRI scan images. The developed model predicts the presence of a brain tumor and the type of the brain tumor. (Python, TensorFlow)

- **Pic 2 Text Mobile App (Individual)** — **Apr 2024 - Present**
  I have developed a mobile application capable of extracting text from images. Recognizing the potential of Huawei's platform, I am in the process of registering as a Huawei developer and finalizing the app for release on Huawei AppGallery.(Android Studio, Java, Google ML)

- **Sales Insights Project (Individual)** — **Mar 2024**
  I have developed a dynamic dashboard showcasing the dynamically growing sales within a company. The interactive dashboard presents relevant and real-time data from MySQL databases, empowering companies to make data-driven decisions effortlessly (MySQL, Power BI)

- **Loan Status Prediction (Group)** — **Aug 2023 - Dec 2023**
  I contributed in an academic project related to machine learning, where we had to evaluate the most appropriate algorithm to predict the loan status. I developed the model using the Logistic Regression algorithm, which provided higher accuracy compared to the SVM algorithm. (Python)

- **E-School Mobile App (Group)** — **Aug 2023 - Dec 2023**
  The project focused to develop two mobile application, one tailored to provide free learning resources for school students and the other catering to administration needs .As a frontend developer, I have developed user-oriented and user-friendly interfaces that prioritize usability and engagement of users. (Figma, Android Studio, Kotlin, Firebase)

- **Spices Delivery System (Individual)** — **Aug 2023 - Dec 2023**
  I have developed a dynamic e-commerce website facilitating the buying and delivery processes for spices, enhancing user experience. (MERN Stack, JavaScript, CSS)

EDUCATION

B.Sc.Eng.(Hons) in Computer Engineering
University of Ruhuna (2020 - Present)

G.C.E. Advanced Level Examination (Physical Science)
H/ Vijayaba National School, Sri Lanka (2011 - 2019)

RELEVENT COURSEWORKS

- Data Structures and Algorithms
- Problem Solving with Algorithms
- Database Systems
- Object Oriented Design Patterns and Principles
- Web Application Development
- Software Engineering Principles
- Machine Learning
- Artificial Intelligence

TECHNICAL SKILLS

- Deep learning framework (TensorFlow)
- Machine Learning
- Natural Language Processing
- Computer Vision
- Front-end Development (React)
- Back-end Development (Nodejs)
- Mobile Application Development (Android Studio, Kotlin, Java)
- Databases Management (MongoDB, MySQL)
- Cloud computing (AWS)
- Git / GitHub Version Control
- Programming languages (Python, JS, C++, Java)
- Other skills (Agile, Figma, Power BI, Linux)

LICENCE & CETIFICATES

- Cert Prep: Certified Entry-Level Python Programmer - LinkedIn Learning
- Machine Learning with Python - IBM
- Developing Front-End Apps with React - IBM
- Machine Learning - Simplilearn
- Introduction to Graphic Design; Basics of UI/UX - Simplilearn
- Essential Skills for Your Career Development - University of Leeds
- Improving Communication Skills - University of Pennsylvania

VOLENTERRING

- Volunteer Teacher in Mehewara Program (2021/2022/2023) - University of Ruhuna
